Rapid Eye™
Multi Media Version 6.2

Long-Term Digital Recording & Transmission System

More than a DVR, Rapid Eye™ Multi-Media (REMM) provides a powerful, and intelligent digital storage management tool that combines video, audio, and data capabilities in a single recorder unit. The system is designed to record, search and transmit your video, audio and data transactions—providing users with both live and post-event assessment options.

The system consists of three major components which include: the **Remote Unit (RU)**, featuring LocalView, the local user interface that provides on-site video, audio and data management capabilities and basic system and camera configuration; **ADMIN Software**, the workstation/server-based administration tool capable of enterprise-wide site and user management; **VIEW Software**, the feature-rich, workstation-based operator program. The powerful combination of ADMIN and VIEW truly differentiate the REMM system from the competition.

Superior video images, dramatically improved connection times and dynamically selectable video resolution are the highlights of the V6.2 release. Speedup your Live connections and refresh rates by using the new thumbnail resolution and image size (160 x 120 NTSC) as your default VIEW setting.

REMM can be seamlessly integrated with existing video equipment and incorporated into any TCP/IP and/or Dial-up network—making it one of the most cost-effective solutions for both new and existing video security systems.

FEATURES

Hardware Features:

- 16 Looping Video Inputs
- Optional CD-RW drive for clip generation and easy software upgrades
- Storage capacity from 500, 750, 1000, 2000, 3000, 4500 & 6250 Camera Days
- 16 Alarm Inputs
- 8 Control Outputs
- Fault Relay (Alarm panel ready)
- Public Display Mode
  - Multiplexed using dual VGA Outputs
  - Switching using SPOT Monitor Output
- Dual Audio Channels (Bi-directional)
- 10/100 Network (RJ45)
- Internal Modem standard on all models except 80 ips units
- 2 RS-232 Serial Ports (DB9) for POS data capture, PTZ control and external modem
- Shock mounted field replaceable hard drives
- Easy integration with existing or new CCTV equipment

Software Features:

- Multiple Site - Single Workstation License of ADMIN & VIEW included with unit
- 100% compatible with all Rapid Eye Multi and Multi-Media units

- Multiple Resolutions selectable on a per camera basis:
  - Independently electable for Live & Record
  - 704 x 480 * 640 x 480 * 640 x 240 320 x 240 * 320 x 192 * 160 x 120 (NTSC)
  - 704 x 576 * 704 x 288 * 384 x 288 192 x 144 (PAL)
  - Dynamic Live Resolution (change on the fly)
- DHCP enabled for networks supporting DHCP Server and WINS or DNS
- SNTP client automatically synchronize to SNTP servers
- S.M.A.R.T. - Alarm to detect potential hard disk drive failures
- LocalView – Mouse driven local user interface
  - VGA or Composite Video Output
- Built-in POS or ATM data capture capability
  - up to 4 devices AVBPIT4POS
- RapidSearchTM for video evidence by Events, Data, Motion or Alarm
- Record & Alarm Scheduling
- Remote Alarm monitoring
- Remote Site Tours – Local Live Tour
- Authenticated proprietary file format (REM) for integrity of evidence
- VxWorksTM - A secure, stable multi-tasking real-time operating system (RU)

Rapid Eye™
Multi Media Version 6.2

Recorder Unit, Local View & Public Display

Recorder Unit

The RU is the heart of the REMM system and designed to satisfy the security industry's growing demand for an integrated video security tool. The RU was engineered from its inception for durability and expandability to meet the stringent requirements of today's security environment.

The new rugged chassis offers a sleek, modular design suited for desktop or rack-mount installations. It fits perfectly into a standard 19" EIA rack and can be fitted with the optional slide rack-mount kit (HRMSLIDE) that makes servicing your installation simple. The removable front panel features a key lock, concealing four field replaceable/expandable hard drive bays; the optional CD-RW drive for creating evidence clips of your security data locally at the RU site; and red power button for front panel power control. The detachable rear BNC panel allows servicing of the unit without the removal or disruption of your coaxial cable leads. The RU is equipped with two independent 2-way audio channels that offer users the ability to monitor and record synchronized audio streams. Data handling capabilities enable the RU to connect with a growing list of POS devices such as cash registers and ATMs for monitoring, recording and retrieval of critical business data. All physical connections are made directly to the RU, including 16 cameras, 16 alarm input devices, eight auxiliary control outputs, two serial ports for control of most industry standard PTZ domes, and connection to POS and ATM devices. Using our multi-port protocol interface translator (AVBPIT4POS) up to four POS or ATM devices can be connected to a single serial port on the RU.

The REMM RU is offered in 38 standard configurations, making it one of the most versatile products in the industry. This versatility focuses on the real issues confronting users of digital recording products today including, length of time for storage of video, video capture rate (ips), and the option to record incident clips to a CD-RW at the RU site. Our intuitive RU model number allows you to configure the right unit for every application. (See ordering information on back.)
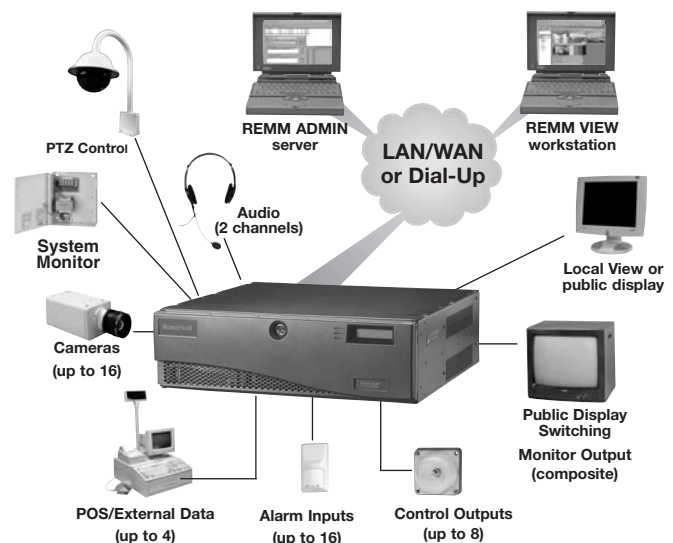

LocalView

LocalView, the local user interface, enables the user to define basic system and camera configurations, view live and recorded video, audio, and data at the RU site. LocalView features three levels of password protected security. Using only a VGA monitor (not supplied), and a PS2 mouse (supplied), the user can configure system and network settings such as: unit name, time zone, date, IP address, network mask and gateway. Camera configurations include: live video window, settings box for manual and AGC controls, selected camera box for name and type (camera) designation, a resolution box, a recording box for rate (capture) and quality settings. Video management capabilities include: eight live video tabs that are individually configurable by selecting from one of 15 pre-defined camera grids. The grids range from a single camera to a 4x4 matrix, allowing a multiplexed view of all 16 cameras in a single panel. The live video tabs can be made to cycle through automatically, creating a user definable "live tour" of all cameras attached to the RU.

Recorded video, audio and data can also be reviewed and played back in its own video tab called clip builder. Clip builder can be arranged in any of the 15 pre-defined grids allowing up to 16 video streams to be displayed. A user can store the clip to the RU's hard drive or directly to a CD-RW if the unit is equipped with the optional CD-RW drive. The clip player tab provides a utility to review a pre-recorded clip from the RU's hard drive, or from a previously recorded CD, loaded in the CD-RW drive. Both clip builder and clip player provide mouse selectable, VCR-like controls, such as, play, pause, fast-forward and rewind.
Public Display

The RU provides several methods for satisfying Public Display requirements to a composite video output. The Spot Monitor Output provides a user configurable switching output of all available cameras. LocalView can be used to display a multiplexed view or several different multiplexed views of all cameras using the Public Display option. The VGA output of the RU can then be converted to a composite video output using a VGA to composite converter and the resulting analog signal can be displayed on a composite video monitor.

ADMIN Software

VIEW Software

Rapid Eye™
Multi Media Version 6.2
ADMIN & VIEW Software
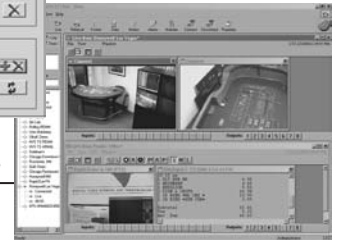

ADMIN Software
HRM62ADMIN
(included w/RU)
ADMIN Software, REMM's system administration tool, is capable of enterprise-wide site, user, tour and alarm station management. This Windows-based administration software provides a user friendly GUI for creating REMM's database. The database can be as small as a single site with a sole user, based on a single computer, using Microsoft Access as the default database. ADMIN can also be hosted on a network server using any of these common networked database protocols including, Access, SQL or MSDE, serving thousands of users and sites. ADMIN makes controlling and administering a multi-site, multi-user, enterprise-wide system fast, easy and secure.

VIEW Software
(single copy included w/RU)
HRM62VIEW
(can be ordered separately)
VIEW Software is the feature rich, Windows-based operator software that provides a user friendly GUI for complete operation and configuration of one or many different RU's simultaneously.

Observe and monitor live or recorded video, audio and data from any RU listed in your site tab. Connect to multiple sites simultaneously using multiple connection methods from the same or multiple workstations and connect to the same RU site using multiple connection methods. LAN/WAN networks and dial-up connections are supported with a standard TCP/IP protocol. Dial-up connections can be made using PSTN or ISDN with appropriate hardware. Control multiple PTZ cameras, monitor two independent 2-way audio channels, monitor up to four streams of POS or ATM generated data, configure 16 alarm input devices, and control eight auxiliary outputs—all from within a single session of VIEW. Define event and alarm conditions including motion detection on a per-camera basis, search for events, logs and data strings and review the associated video, audio and data instantly using the RapidSearch™ feature in VIEW.

FEATURES

Video Features:

- 16 BNC composite video looping inputs with auto termination
- RU available with capture rates of 20, 40, 60 or 80 ips, shared between recording and live transmission
- Individual camera configuration including name, camera type, manual or AGC control of video image, recording rate in ips and image quality
- Advanced video motion detection with user definable exclusion zones per camera
- Auto detection and changeover of camera type from color to monochrome in low light situations (when using color/monochrome changeover cameras)
- LocalView the local user interface provides on-site live monitoring, review of recorded video, audio & data, local clip generation and record clip to a CD-RW on RU equipped with CD-RW drive
- LocalView a single live stream of video will be displayed at a resolution of 704 x 480 (NTSC) 704 x 576 (PAL) when using a single stream grid in a Live tab
- Public Display Mode- User-configurable switched and/or multiplexed outputs available

Audio Features:

- Two independent channels synchronized with the video and data streams
- Bi-directional audio – The VIEW operator can talk and/or listen on each channel independently, directly to the remote site(s)
- Monitor, record and record-to-clip with associated video and data streams locally and remotely

Data Features:

- Monitor and record critical business data from ATM and POS devices
- Review and search recorded data using our data search engine; review associated video stream
- Support for up to four separate data sources, with each data stream displayed as an individual window within the VIEW environment (additional hardware required)

Rapid Eye™
Multi Media Version 6.2

Long-Term Digital Recording & Transmission System

SPECIFICATIONS

Remote Unit Hardware Capacity

Connections	Max per Remote Unit
Cameras	16
Inputs (alarms)	16
Outputs (control)	8
Audio	2

Rapid Eye VIEW Software Capacity

Sessions	Max per Remote Unit
Live video sessions (all users)	32 streams
Video retrieval sessions (all users)	32 streams
Users viewing live video (and activating outputs)	10 sessions
Users retrieving video	10 sessions
Users accessing alarms	10 sessions
Users accessing events	10 sessions
Users accessing Maintenance	1 session

ADMIN and VIEW Workstation Requirements
(Minimum recommendations)
- IBM-compatible PC
- Microsoft Windows 98, NT, ME, 2000 or XP
- Pentium II or Pentium III class CPU (min. 600MHz recommended)
- 128MB RAM
- 200MB of free hard disk space, plus adequate storage for video clips
- CD-ROM (for software installation and upgrades)
- Video card(s) and monitor(s) that supports SVGA mode (800x600 pixels) or better (XGA 1280x1024) preferred
- Mouse or other Windows compatible pointing device
- For dial-up connections* Honeywell Video Systems approved V.90/V.92 modem or ISDN modem
- For LAN connections Windows compatible 10/100 Fast Ethernet Network Interface Card (NIC) configured for TCP/IP protocol
Remote Unit Specifications
- Video Standards:
  – NTSC/EIA or PAL/CCIR
  – Individual AGC profile and configuration settings for each camera
- Video Format:
  – Multiple resolutions REM proprietary format
  – 24-bit true color (over 16 million colors)
- Record and Transmission Format: modified H.261/263 (DCT) w/proprietary dual threshold processing yielding high quality vs. bit rate
- Record Mode: continuous circular buffer (FIFO)
- System Record Capacity: 500, 1000, 2000, 3000 or 6250 camera days (based on model)
- System Update Rate: (maximum)
  – 20, 40, 60, or 80 ips (based on model)
  – Individual camera selectable from 1/4 to 30 ips
- Video Quality Settings:
  – 10 = highest quality, shortest record duration
  – 1 = lowest quality, longest record duration

- Video Motion Detection and Search:
  – User-configurable to sense mass and motion intensity within multiple regions-of-interest
  – User-configurable post event video motion search within multiple regions-of-interest
- POS/ATM and Event/Alarm Action Filters:
  – Initiate action and/or report upon specific serial data or event transactions
  – Post-event search of a specific recorded data stream qualifier
- Record and Remote Reporting of Events:
- Session
  – Session request
  – Session rejection
  – Session disconnect
- System
  – Run-time failure   – Self restart
  – Reboot   – Video Recording
- Time Server   – Synchronize &
  – Maintenance   – System clock drift
  – S.M.A.R.T
  – System configuration
  – Security modification
  – System file modification
- Synchronize time
  – Clear storage   – Clear Steam
- Input
  – Input sensor activation/deactivation
- Output
  – Output sensor activation/deactivation
- Video
  – Video loss/restore
- Motion
  – Video motion detection
  – POS/ATM data
- Mass Storage: [4] shock mounted field-upgradeable hard drive bays
  – All drives mounted on field serviceable carrier sleds
  – Convenient upgrading and servicing of local storage
  – Power-Off, "cold swap" operation
- Removable Media: [1] field upgradeable CD/RW Bay
  – Supports optional CD/RW drive for event back up and archiving
  – 2nd aux. device bay reserved for future expansion
- Front Panel Control and Display Module: (secured behind lockable front panel)
  – Power Switch (low voltage control)
  – System Ready LED
  – Alarm State LED
  – HD Activity LED
  – 2x16 alphanumeric system status LCD display indicating operational status and system health monitoring
- SNTP Client: "Simple Network Time Protocol"
  – Synchronize all devices on the network to a SNTP server

Note: * Honeywell Video Systems approved PC modems at time of this printing include: Zoom Model 2920 internal PCI modem, Zoom Model 3049L external serial modem and Zoom Model 3075 PCMCIA modem. Contact Honeywell Video Systems representative for latest approved models @ 1-800-769-CCTV.

Rapid Eye™
Multi Media Version 6.2
Long-Term Digital Recording & Transmission System

Rapid Eye™ Multi-Media Rear Panel

SPECIFICATIONS CONTINUED

Rear Panel Connections
- Video Inputs: [16] composite 1Vp-p
  - Looping BNC w/ 75 Ohm auto-termination
  - Removable rear connector panel for convenient servicing
- Video Outputs: [2] composite 1Vp-p
  - Monitor 1: NTSC/PAL spot or sequential real-time switcher
  - Monitor 2: NTSC/PAL color bar test pattern
- Audio Inputs: [2] line level
  - Line inputs via 3.5mm stereo mini jack
  - Mic-in: reserved for future use
- Audio Outputs: [2] Line Level
  - Line outputs via 3.5mm stereo mini jack
- Alarm/Control Inputs: [16]
  - TTL level, dry contact or EOL (end-of-line) resistor sensing
  - Software configured as NC, NO or 2K EOL
  - Removable 3.5mm terminal block plugs
- General Purpose Control Outputs: [8] 5V TTL
  - Removable 3.5mm terminal block plugs
  - 50mA max @ 5V each output
- Fault Relay: DPDT Form C Relay 28V, 3A
  - Monitors internal watchdog circuitry
- Serial Ports: [2] RS-232
  - COM1: DB9 (M) External modem, PTZ control or POS/ATM (cables provided)
  - COM2: DB9 (M) PTZ control or hyper terminal configuration (cables provided)
- Modem/Telco: [1] V.90 multi-protocol modem
  - 19.2Kbps to 33.6Kbps on typical North American dial-up connection (No internal modem on 80 IPS units)
  - Standard RJ11 handset cable interface (cable provided)
- Networking: [1] 10/100 baseT fast Ethernet
  - Standard RJ45 supporting CAT5 cable plug
- Desktop Monitor: [2] VGA
  - Supports LocalView UI through standard analog desktop monitor (800x600 support required)
  - Supports remote analog composite monitor through VGA–NTSC/PAL converter
  - Port 2 reserved for future use - duplicates port 1 by default
- PS2 Mouse: [1] 6pin MiniDIN
  - Supports LocalView UI functions (PS2 mouse provided)
- PS2 Keyboard: [1] 6pin MiniDIN
  - Not required for operation
- Printer Port: reserved for future use
- USB Ports: [4] reserved for future use
- AC Power: [1] 100 - 240VAC 50/60Hz input
  - Modular IEC-320 connector (regional power cord provided)

PTZ Dome Control
- Honeywell Video Systems RapidDome and Orbiter Domes
- Honeywell Video Systems Domes KD6 Series
  - VCL or Pelco P or D code
  - KD6 Diamond available Q1 2005

Also compatible with other manufacturers including:
- Javelin 308 Series
- Kalatel
- Pelco P&D codes
- Sensormatic RS422

Electrical
- Nominal Power Requirements:
  - 115 - 230VAC, 63-47Hz, 6-3A
  - Auto Sensing 115V/230V operation

Mechanical
- Desktop or rack mount configurable:
  - Removable rack ears
  - EIA 19" rack mount slide kit available as an option
  - All critical components secured behind lockable front panel
- Dimensions:
  - 5.23" (3RU) H x 17.3" W x 18.8" D (133mm H x 440mm W x 478mm D)
  - 17.4" (442mm) unit depth without removable front panel
- Weight: (model dependent)
  - Unit weight: 32lbs - 42lbs (14.5kg - 19kg)
  - Shipping weight: 38lbs - 48lbs (17.5kg - 22kg)

Environmental
- Operating Temperature:
  - Non-condensing, 40° to 104° F (5° to 40°C)

Regulatory
- Emissions
  - FCC: Part15, Class B
  - CE: EN50081-1, (Class B)
  - CE: EN61000-3-2 (Harmonics)
- Immunity
  - CE: EN50130-4 (w/use of UPS)
- Safety
  - UL-Listed for U.S. and Canada:
  - UL 1950, CAN/CSA-C22.2 No. 60950-00
  - CE: EN60950: 2000

Typical Number of Days of Recorded Video

Estimating the number of days a Rapid Eye™ Multi-Media Remote Unit will record: (See web site for storage estimator.)

- Based on your application need, determine each camera's desired update rate (in images per second). Sum total of all cameras' ips cannot exceed RU ratings.
- If all cameras are set for the same update rate, simply multiply the update rate times the total number of cameras, (e.g., 2 cameras x 8 ips = 16 total ips).
- If all cameras are not set for the same update rate, add each camera's update rate (in images per second) together (e.g., 6 ips for camera one + 10 ips for camera two = 16 ips total).
- Locate your total images per second in the chart above. The column underneath helps you select the appropriate RU for your application's record duration requirements.
- The above table shows typical durations that assume: a quality setting of 7 and no audio or data recording; securely mounted cameras with wide angle lenses; up to two non-auto-panning domes (pre-set operation recommended).
- Record duration, or the quantity of images that can be recorded on RU hard drives, can vary from half to two times the typical results shown in the chart above.
